**NOTE: This student is a Course 9: Brain and Cognitive Science major. A Course 5: Chemistry minor would have been completed if Organic Chemistry of Life (Harvard, see Senior Spring) were used by the Chemistry Department at 5.13 credit, but it is not. This student also has a Concentration in Music and took several Course 6: Electrical Engineering and Computer Science classes for fun, including courses offered during IAP (there is no Course 6 minor). Two out of four IAPs, as well as two summers were spent abroad through MISTI. \*Special note about 9.URG: work was done over the summer and credit was received during the subsequent fall semester**
